Welcome word from the Chair

After obtaining the European Commission's only educational excellence label (Erasmus Mundus) in 2019 our Erasmus Mundus Joint Master Degree in Tropical Biodiversity and Ecosystems (TROPIMUNDO) faced, together with the rest of the world, a global health crisis. Upon arrival in Guadeloupe, Sri Lanka and Malaysia in February 2020 none of our students could have predicted that they would have had to spend most of their tropical hands-on semester behind a computer following online classes. While we must face the reality of a changed world and a shift from live to online classes in 2020, we are doing everything in our possibility to make sure our students achieve the learning competences aimed at in our inter-university programme.

Our 12 teaching partners in Belgium, France, Italy, French Guyana, Guadeloupe, Cameroon, Madagascar, Reunion Island, Sri Lanka and Malaysia and our >50 Associated Partners from the field of research, government, NGOs, SMEs, international associations, etc. assure excellence in education, research and international networking in tropical biodiversity and ecosystems, a focus much-needed in this era marked by a largely tropical biodiversity crisis. Nearly 140 graduates working on rainforests and woodlands, savannahs, mangrove forests, seagrass beds, coral reefs and even tropical open ocean waters have participated in and contributed to our excellence programme, and many are now pursuing academic careers as lecturers and/or researchers.

Calendar info: This calendar was made using photographs courtesy of our students. All photographs were taken between 2013 and 2020. National holidays in Belgium, France, Italy, Cameroon, Madagascar, Sri Lanka and Malaysia, our study sites, were included and so were selected events of international importance.

Did you know?

Did you know that TROPIMUNDO was the first Erasmus Mundus programme to offset the carbon emissions caused by its compulsory student and staff mobility? In the meantime it has become an annual tradition.
